VibeForm — Full-Stack Challenge

📝 Project Description

Most online forms today feel old, boring, and stressful. Google Forms, SurveyMonkey, Typeform — functional but not fun. They overload users with long fields, dull design, and zero personality.

Forms shouldn't feel like homework. They should feel like a mini interactive experience.

VibeForm is our vision of the next-generation form builder: simple, modern, aesthetic, and Gen-Z friendly — something that's actually enjoyable to fill out and fun to share.

🎯 What We Want to Build

We want to reinvent forms into something:

- **Fast to create** (1–2 clicks, maybe AI-powered)

- **Fun to fill** (gamified, emoji-first, progress rewards)

- **Attractive / aesthetic** (Y2K, pastel, neon, or playful interactions)

- **Delightful to complete** (animations, confetti, XP points)

- **Shareable on social media** (turn your form into content)

Think of VibeForm as:

- a **Gen-Z feedback collector**,

- a lightweight **event registration tool**,

- a creative **lead capture form**,

- or a fun **poll / quiz** system.

We want to see **your creative interpretation** and **your product thinking.**

🧩 Challenge Requirements

Below are the **minimum required features** to complete the challenge.

✅ 1. User Registration / Login

- You can use any method:

    - Email/password

    - Google login

    - GitHub login

    - Or anything supported by your stack

- Once logged in, users should see a dashboard of their created forms.

✅ 2. Create Forms (Should Be Extremely Easy)

This is a key part of the challenge.

What we want:

- Creating a form should feel **fast**, **lightweight**, and **intuitive.**

- Aim for **1–2 clicks** to generate a form.

- Allow at least **3 question types**:

    - Short text

    - Multiple choice

    - Emoji rating / emoji scale

- Think about:

    - A pre-filled template

    - AI-generated form questions

- "Quick Form" one-click creation

- A slick dark/light theme

- A simple drag-and-drop editor (if you want to go further)

The UX should be **modern, clean, and friendly.**

✅ 3. Fill Out Forms (Gamified Experience)

This is where VibeForm should feel **fun.**

When someone is filling out a form:

- use **animations**,

- **cute UI transitions**,

- **emoji interactions**,

- **progress bar**,

- maybe **XP points** or a **vibe score.**

Make it feel more like a mini-game than a survey.

Examples:

- A bar that moves with each answer

- Buttons that wiggle or bounce

- Soft spring animations

- Confetti when a question is completed

✅ 4. Form Completion Screen (Delightful Ending)

When the user finishes:

- Show a **celebration animation**

- Example:

    - confetti

    - exploding emojis

    - shining gradient

    - "+20 vibe points 🌟"

    - "You're awesome!"

Then show:

- A **call to action** to share the form

- A **thank-you message**

- Maybe a **social share card preview**

Make it memorable.

🚀 Delivery Requirements

At the end, you must provide:

🔗 1. Production-Ready URL

- Hosted on Vercel / Netlify / Firebase / Cloudflare / etc.

- Anyone can:

    1. Sign up

    2. Create a form

    3. Share and fill the form

    4. View results

📦 2. GitHub Repository

Include in the README:

- Stack choice & justification

- Instructions on running locally

- Architecture (form & responses model)

- What features you implemented

- What you would do with another week

🎥 3. Video Demo (1–3 minutes)

Show:

1. Creating a form

2. Filling the form

3. The gamified interactions

4. Completing & seeing animations

5. Viewing responses

✨ 4. Why Your Design Stands Out

A short write-up covering:

- What's unique about your UX

- How you made forms more fun

- What Gen-Z element you focused on

- Why someone would rather use VibeForm than Google Forms

⭐ Extra Features (Bonus Points)

You get extra credit for any of these upgrades:

🎉 Aesthetic Themes

- Y2K

- Neon

- Pastel

- Minimal black/white

- Vaporwave

⚙️ AI-Assisted Form Creation

- "Generate form from title"

- "Suggest 3 follow-up questions"

- "Turn my goal into a form"

📊 Responses Dashboard

- Display responses with charts or stats

- Real-time updates

- Download CSV

👀 Public Templates Gallery

- "Event Feedback Form"

- "Quick RSVP Form"

- "Customer Preferences"

💌 QR Code Mode

- Generate QR for sharing forms instantly

📱 Mobile-first UI

- Make filling forms feel like a smooth mobile app

🎮 XP System

- Completing forms earns vibe points

- Points unlock themes or badges

📳 Shareable Result Page

- "I completed a VibeForm 🔥 — Try it!" social card

Take your time to build the website, we have recommended a week of time to build this project. Once completed, please email hr@eventgo.ca with all required details. Happy crafting!
